

15th Annual

BULL SALE

Friday, November 15, 2013

Tetonia, Idaho

15th Annual Bull Sale Friday – November 15, 2013

**120 Registered Angus Bulls
3 Registered SimAngus Bulls
15 Commercial Angus Bred Heifers**

LOCATION:

At the ranch 4 miles south and 1 mile west of Teton, ID (see map on page 1 of this sale book)

Please join us for a pre-sale dinner at the North End Cafe, Teton, ID, Thursday evening at 6:30 p.m. Complimentary lunch will be served at noon sale day.

Sale at 1 P.M. MST

INSPECTION OF CATTLE:

We invite you to inspect our cattle anytime. The bulls will be in their sale pens Tuesday, Wednesday and Thursday before the sale on Friday.... Drop by early and make your selection before sale day.

SALE ORDER:

Bulls and heifers will sell in sale book order.

ACCOMMODATIONS:

Teton Mountain View Inn, Teton, ID(208) 456-2741
Super 8, Driggs, ID(208) 354-8888
Cowboy Roadhouse Lodge, Victor, ID(208) 787-2755

HERD HEALTH:

Our cattle are on a complete herd health program, and will sell with proper health papers for interstate shipment. In addition, we are federally licensed brucellosis free herd #IDCB03, and a level one Johne's free herd. All of the sale cattle have had a fall 8-way, de-wormed with Dectomax pour-on, and administered BOVI-SHIELD GOLD FP 5 VL5 HB.

FEED RATION FOR BULLS:

Our bulls are developed in a practical manner, consistent with a mountain ranch. The bulls are raised without creep, and upon weaning fed a TMR to gain 2.5 lbs./day. This spring they were turned to grass, and were supplemented with hay starting in mid-September. They have not been fed any grain and have less than 0.10" of back fat. The bulls will sell in their working clothes.

TERMS AND CONDITIONS:

We expect you to be completely happy with your purchase, and will do what we can to assure this is the case. All bulls are fully guaranteed as outlined in the Terms and Conditions of the American Angus Association effective June 7, 2012.

RETAINED INTEREST:

We have retained interest in some of the bulls. They either are marked in the sale book, or will be announced sale day. As the bull buyer, you have complete control over bulls in which we share an interest. The bull buyer receives the salvage value of the bull. Our interest applies to semen sales, and the ability for us to collect semen on the bull. If we desire semen, we will have the bull collected at our expense and your convenience. If you sell the bull as a breeding bull, we maintain our interest.

WINTERING PROGRAM:

We offer the option of delivering your bulls shortly after the sale, or in late April. If you would like us to winter your bulls, we will do so for \$450 per bull. The bulls will be fed long stem hay, and mineral. If you choose this option, our clerks will add this to your invoice on sale day.

DELIVERY:

Pick up your bulls within five days of the sale and receive a \$75 credit per bull. Otherwise, there is free delivery on the bulls to Idaho and adjoining states, including northern Colorado, with total purchases of \$2,500 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each. We will help arrange delivery of commercial heifers at buyer's expense.

REPRESENTATIVES:

Rod Wesselman, (509) 765-9219. . . American Angus Association
Curt Cox, (307) 630-4604. Wyoming Livestock Roundup
Jerry York, (208) 863-1172 Western Livestock Journal

AUCTIONEER:

Joe Goggins, (406) 861-5664

Announcements made sale day take precedence over printed material.

EPDs:

The EPDs listed in this sale book are current as of October 10, 2013. Updated EPDs can be viewed at www.angus.org.

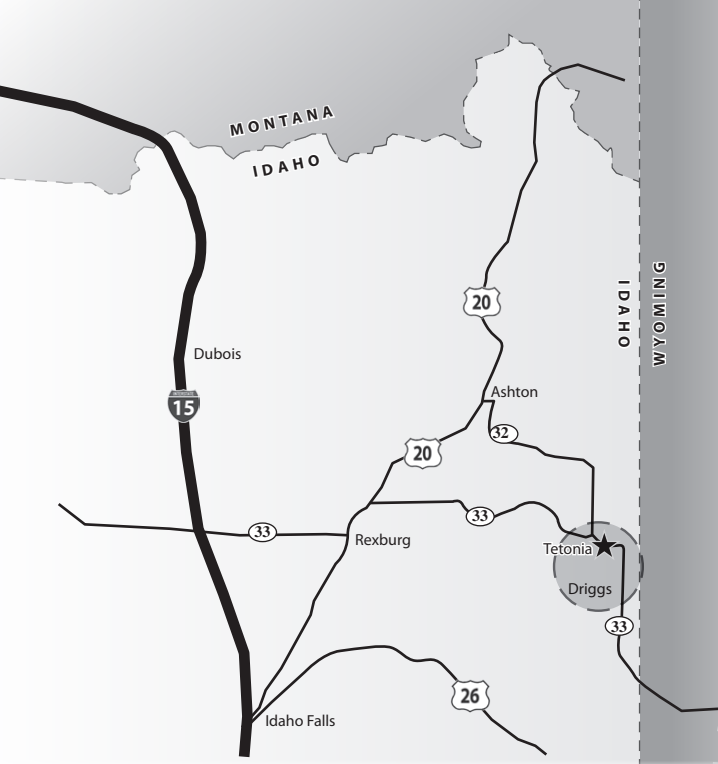

Visit the *Angus Journal*® Website, www.angusjournal.com, and view this sale book online.

HD DUNN & Son
ANGUS RANCH

First Year Breeding Guarantee:

All bulls selling for \$2,000 or more will be covered by this guarantee. If your bull is injured, and not able to naturally service cows, during the 90 days after initial turn-out we will give you credit toward a replacement bull or future sale. The credit will be equal to one-half of the bull's sale price, less one-half of his salvage value. Please have all injured bulls diagnosed by a veterinarian, and notify us before September 1, 2014 if you elect to make a claim.

Please note, this is not a life insurance policy. If you would like to purchase mortality insurance, an insurance representative will be available sale day.

Absentee Bidding:

We offer a 100% satisfaction guarantee on cattle purchased in your absence.

- We invite you to call Ken Dunn or C.L. Simper before the sale to select the lots you would like to purchase. We will bid in your absence and assure your spending limit is not exceeded.

Ken Dunn (208) 221-3866 or C.L. Simper (307) 380-6021

- You may also call Rod Wesselman (Angus Association) 509-765-9219 or Curt Cox (Wyoming Livestock Roundup) 307-630-4604 or Jerry York (Western Livestock Journal) 208-863-1172 to place an order.
- This year we will not have a conference call line on sale day... If you cannot be with us sale day, please plan to come a few days before the sale and make your selections.
- We guarantee your satisfaction on bulls purchased in your absence.

Expected Progeny Differences are a prediction of how progeny of a sire will perform in each of the traits listed. EPDs are expressed in pounds. For example, Bull A has a weaning EPD of +50, and Bull B has a weaning EPD of +30. If these two bulls were used in your herd, on average, Bull A's calves would weigh 20 pounds more than Bull B's at weaning. EPDs are developed by the American Angus Association and are valuable for comparing the performance of animals within herd, and across herds.

CED - Calving Ease Direct EPD

Calving ease direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW EPD - Birth Weight EPD

This expresses the expected birth weights of a bull's progeny. This figure is valuable in selecting bulls to use on heifers. Typically, a BW EPD of less than 2.5 is preferred for heifers.

WW EPD - Weaning Weight Direct EPD

This is a predictor of the sire's ability to transmit weaning growth to his progeny.

Milk EPD - Weaning Weight Maternal EPD

The Milk EPD is the number of pounds of weaning weight that can be attributed to the milking ability of the bull's daughters.

YW EPD - Yearling Weight EPD

This is a predictor of the sire's ability to transmit yearling growth to his progeny.

ACTUAL BW - Actual Birth Weight

All of our calves are individually weighed at birth. This is their actual birth weight.

205 RATIO

The measure of each bulls weaning performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. We manage our calves in two contemporary groups. One group is calves born to cows; the other is calves born to heifers.

365 RATIO

The measure of each bulls yearling performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. The contemporary groups established at weaning are maintained through yearling.

ACT SCROTAL - Actual Scrotal

This is the bull's actual scrotal circumference, as measured on September 12, 2013.

PAP SCORE - Actual Pulmonary Arterial Pressure Result in inches of mercury

The PAP measurement is used to predict animals that are susceptible to developing pulmonary arterial hypertension (i.e. brisket disease) resulting in congestive right heart failure. Our PAP scores were taken by Tim Holt DVM of Gunnison, CO on September 15, 2013 when the bulls were roughly 16 months old.

MARB EPD - Marbling EPD

Marbling EPD is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RE EPD - Ribeye Area EPD

Ribeye Area EPD is expressed in square inches and is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$EN - Cow Energy Value

Cow Energy Value is expressed in dollars savings per cow per year, and assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

\$W - Weaned Calf Value

Weaned calf value quantifies four primary economic impact areas; birth weight, weaning weight, maternal milk, and mature cow size. \$W provides the expected dollar-per-head difference in future progeny preweaning performance in a multi-trait fashion.

\$F - Feedlot Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires. \$F uses weaning weight and yearling weight EPDs along with trait interrelationships and industry values for days-on-feed, ration costs, and cash cattle prices. Typical feedlot gain value, feed consumption, and cost differences are accounted for in the final calculation.

\$G - Grid Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires. \$G combines quality grade and yield grade attributes, and is calculated for animals with carcass EPDs, ultrasound EPDs, or both. A three-year rolling average is used to establish typical industry economic values for quality and yield grade schedules. Quality grade premiums are specified for Prime, CAB, and Choice carcasses, as well as Select and Standard. Yield grade premiums are incorporated for YG1 and YG2 (high yielding carcasses), with discounts for YG4 and YG5 (low red meat yield). Grid impact in \$/cwt and \$/head is calculated from the yield and quality grade components, and then combined to arrive at the grid value \$G.

\$B - Beef Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning and carcass value compared to progeny of other sires. \$B is composed of two pieces: \$F and \$G. To align \$B with marketplace realities, and appropriately value the carcass weight in Angus cattle, the following factors are incorporated into the final calculations for \$B:

- \$B is not just the sum of \$F and \$G
- Projected carcass weight and its value are calculated, along with production cost differences.
- \$B takes into consideration discounts for heavyweight carcasses.
- Final adjustments are made to prevent double counting weight between feedlot and carcass segments.

The resulting \$B value is not designed to be driven by one factor such as quality, yield, or weight. Instead, it is a dynamic result of the application of commercial market values to Angus genetics for both feedlot and carcass merit.

Dam's Production

This is the actual production record of the dam. For example, 5 WR 104 means the dam of the animal has had 5 calves that have weaned with an average weaning ratio of 104.

Pathfinder Program

The Angus Pathfinder program identifies cows that have excelled in production based on AHIR records of performance. To qualify for the report, a cow must have produced a calf measured through AHIR® in the past 18 months.

In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

The program identifies Pathfinder Cows in herds actively involved in AHIR. First, the female must produce her first calf near the herd's average age for first calving. More specifically, the maximum age accepted for first calving of a Pathfinder Cow is the within-herd average for first calving plus 30 days. The within-herd average is determined separately for each herd on AHIR.

As second criteria, the Pathfinder Cow must maintain a regular calving interval. The maximum calving interval is:
365 Days + (30 Days/Number of Calving Intervals)

Next, the Pathfinder Cow must produce at least three calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 herd mates or contemporaries must be evaluated together each year to determine the weight ratio. To continue to qualify each consecutive year, the cow must produce regularly and wean a calf that helps maintain the average weaning ratio of 105 or above. It is pointed out that once a cow is designated Pathfinder, she is always a Pathfinder, even though she might not qualify for listing each year.

A Pathfinder Cow, or Bull, is identified by the # symbol in front of their name.

Dear Valued Customers:

Welcome to the 15th Annual HD Dunn & Son Bull Sale.

This year we are offering a great set of bulls. This year's bulls have proven to perform on a low impact diet. They will go to work in any environment. Strong feet and leg structure will keep them sound through many breeding seasons.

Here at HD Dunn & Son Angus Ranch we strive to have cows that have good udders, great fleshing ability in harsh weather conditions, and high breeding fertility. We pay special attention to their frame size, feet, and leg structure. These are cows that have longevity in our herd, and they produce bulls that will have longevity in yours.

I hope to see you on sale day. If I can answer any questions prior, please feel free to call me at 307-380-6021. Our customers come first.

Sincerely,

C.L. Simper

C.L. Simper

RATIOS

Ratios are used to compare the performance of one animal to another. They are useful because they indicate how an individual compares to all of the others in the group measured.

Ratios are a percentage calculated by dividing the individual's measure, by the average of the group's measure. For example, if bull A's weaning weight is 700 lbs., and the average of the group measured (contemporary group) is 675 lbs., bull A's weaning ratio would be 104 (700 divided by 675 multiplied by 100). It is customary to round the result, so instead of 103.7 we would say 104.

The ratio for an animal that is average in a trait is 100. This is illustrated as follows; bull B's weaning weight is 675, and the average of the contemporary group is 675, his ratio is calculated by dividing his weaning weight of 675 by the contemporary average of 675 multiplied by 100. This equals a ratio of 100.

CONTEMPORARY GROUPS

When calculating ratios, there are two things one must first decide: what is to be measured, and what group do you want to compare. Deciding what to measure is simple. We measure all performance aspects of our animals: birth weight, weaning

weight, yearling weight, ultrasound carcass measures, PAP, etc. What's more of an issue is what groups do you compare. Establishing accurate contemporary groups is extremely important in measuring genetic variation. Contemporary groups are the cornerstone of genetic evaluation.

A contemporary group is a set of animals that have had an equal opportunity to perform: same sex, managed alike, and exposed to the same environmental conditions and feed resources. Contemporary grouping allows animals to be evaluated on how well they performed compared with their herdmates raised under similar environmental conditions.

Accurate contemporary groups require the breeder to ensure all animals in the group have been managed in the same manner.

We also believe in large contemporary groups. It is much more difficult to excel when competing in a large group than a small one, yet many breeders divide their herd into dozens of small groups. Our bulls are compared in two contemporary groups. One for bull calves out of cows, and one for bull calves out of heifers. We do the same for heifer calves.

We take contemporary grouping seriously, and you can be certain if a bull has excelled here it is because he earned the distinction.

Ken Dunn

Dear Cattlemen,

I invite you to attend our 15th annual production sale, to be held on the 15th of November, 2013.

As you study the sale book and walk through the sale offering, I think you will see that we have remained true to our breeding philosophy. The foundation of our cowherd is genetically based upon cattle proven to work in the mountain west. While some breeders have pursued a path of extremes, we have chosen a path of moderation. Additionally, we have almost no New Design 036 or Precision lines of cattle in our pedigrees. These lines of cattle are proven to require too much feed, have poor udder structure, and are the carriers of genetic defects.

Ours are cattle that can withstand the rigors of a harsh environment, calve unassisted, breed back and milk on limited feed, and have outstanding udder quality, foot and leg structure, and moderate mature size. These are the traits that are important to our program, and this is what you will find in our sale offering.

Our coming two-year-old bulls sell in their working clothes: less than 0.10" of back fat, no clipping, no washing, no trimming, and no grain. This is better for the bulls, and you will know exactly what you are getting. I expect you will like what you see at the sale and, more importantly, they won't fall apart upon arrival at your place.

As you plan your fall schedule, I hope you will make time to join us for our sale. I think you will find our cattle well worth your time to evaluate, enjoy a rapid paced sale and a meal second to none.

The bulls will be in their sale pens on Tuesday, Wednesday and Thursday before the sale on Friday. If the weather looks threatening, or if it would just be more convenient to visit us prior to sale day, please feel free to drop by and make your selections early. We can arrange for your bids to be made sale day and guarantee satisfaction with all orders.

Please call any time if you would like to visit about the bulls or our operation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ken Dunn', written over a light-colored background.

This is our second offering of Game Day sons, and we think you will like them. We calved 15 daughters this spring and found them to be very good young cows. We will calve over 30 daughters this coming spring, and bred even more to him this year. Game Day progeny are thick, deep, moderate sized and the females have a lot of volume. Game Day ranks in the top 7% of the breed for \$EN, 2% for RE, and 1% for \$W.

Great Plains sets the standard for cattle that work well in a mountain environment. His calves come very easy, with a lot of vigor, perform very well and have great eye appeal. His daughters are some of our best cows, with excellent udders, capacity, and ability to thrive in an all grass environment. Great Plains transmits exceptional ribeye performance and ranks in the top 2% of the breed for \$W. Great Plains' dam is the breed matriarch Dixie Erica of C H 1019 which makes him a maternal brother to OCC Emblazon 854E, OCC Echelon 857E, OCC Exodus 712E, and many other Ohlde greats. We have used Great Plains for a number of years, and because of the demand for his sons and outstanding daughters, we have started using him again. Great Plains is owned by Sitz Angus Ranch, Ohlde Cattle Co., and HD Dunn & Son Angus Ranch.

Rito 18 has proven to be a great breeding bull and has been used across our program, in large measure, to add the maternal influence of his dam. Rito 18's dam is an exceptional 338 daughter and given the success we had with Right Time 338, we chose this bull to keep that influence close up in our breeding.

Mountain Pass is a very interesting breeding bull. I discovered him when delivering bulls to Jon Gabel at Culver Cattle Company and found him to be an exceptional individual. Mountain Pass has proven to be a low PAP bull, and his daughters are moderate, sound, easy fleshing and good uddered. Mountain Pass' second dam, 4317, is the mother of our Explosion V1495 bull, and the dam of his mother's sire is Dixie Erica of CH 1019, the mother of Great Plains. We used Mountain Pass heavily again this spring.

Lot 3 was used to breed a group of our cows. Selling 2/3 interest and full possession.

Pick up your bulls within five days of the sale and receive a \$75 credit per bull. Otherwise, there is free delivery on the bulls to Idaho and adjoining states, including northern Colorado, with total purchases of \$2,500 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each.
