

17th Annual

BULL SALE

Friday, November 20, 2015

Tetonia, Idaho

17th Annual Bull Sale

Friday – November 20, 2015

128 – Registered Angus Bulls • 16 – Registered SimAngus Bulls
10 – Registered Angus Bred Heifers • 66 – Commercial Angus Bred Heifers

*Please join us for a pre-sale dinner at
Stingers (formerly North End Grill), Teton, ID, Thursday evening at 6:30 p.m.*

Complimentary lunch will be served at noon sale day.

Sale at 1 P.M. MST

LOCATION:

At the ranch 4 miles south and 1 mile west of Teton, ID
(see map on page 1 of this sale book)

INSPECTION OF CATTLE:

We invite you to inspect our cattle anytime. The bulls will be in their sale pens Tuesday, Wednesday and Thursday before the sale on Friday.... Drop by early and make your selection before sale day.

SALE ORDER:

Bulls and heifers will sell in sale book order.

ACCOMMODATIONS:

Super 8, Driggs, ID(208) 354-8888
Cowboy Roadhouse Lodge, Victor, ID(208) 787-2755

HERD HEALTH:

Our cattle are on a complete herd health program, and will sell with proper health papers for interstate shipment. In addition, we are federally licensed brucellosis free herd #IDCB03, and a level one Johne's free herd. All of the sale cattle were given BOVI-SHIELD GOLD FP5 VL5 HB this spring and in the fall they received an 8-way and dewormed with Dectomax Pour-on.

FEED RATION FOR BULLS:

Our bulls are developed in a practical manner, consistent with a mountain ranch. The bulls are raised without creep, and upon weaning fed a TMR to gain 2.5 lbs./day. This spring they were turned out on grass and in September brought in and fed a high-roughage TMR. The bulls have less than 0.10 of back fat and will sell in their working clothes.

TERMS AND CONDITIONS:

We expect you to be completely happy with your purchase, and will do what we can to assure this is the case. All bulls are fully guaranteed as outlined in the Terms and Conditions of the American Angus Association effective June 7, 2012.

RETAINED INTEREST:

We are retaining 1/3 interest in all bulls selling in the sale. The bull buyer receives the salvage value of the bull. Our interest applies to semen sales, and the ability for us to collect semen on the bull. If we desire semen, we will have the bull collected at our expense and your convenience. If you sell the bull as a breeding bull, we maintain our interest.

WINTERING PROGRAM:

We understand not everyone has the facilities to winter bulls. So, if you would like us to winter your bulls, we will do so for \$2.25/day. If you choose this option, please let the sale clerks know and we will settle for the feed upon pick-up or delivery.

FINANCING AVAILABLE:

Please call Ken 208-221-3866 or CL 307-380-6021 for details about financing.

DELIVERY:

Pick up your bulls within five days of the sale and receive a \$75 credit per bull. There is free delivery on the bulls, and registered heifers, to Idaho and adjoining states, including northern Colorado, with total purchases of \$3,000 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each. We will help arrange delivery of commercial heifers at buyer's expense.

REPRESENTATIVES:

Jake Troutt, (208) 921-6774. American Angus Association
Curt Cox, (307) 630-4604. Wyoming Livestock Roundup
Logan Ipsen, (916) 947-2392. Western Livestock Journal

AUCTIONEER:

Joe Goggins, (406) 861-5664

Announcements made sale day take precedence over printed material.

EPDs:

The EPDs listed in this sale book are current as of October 12, 2015. Updated EPDs can be viewed at www.angus.org.

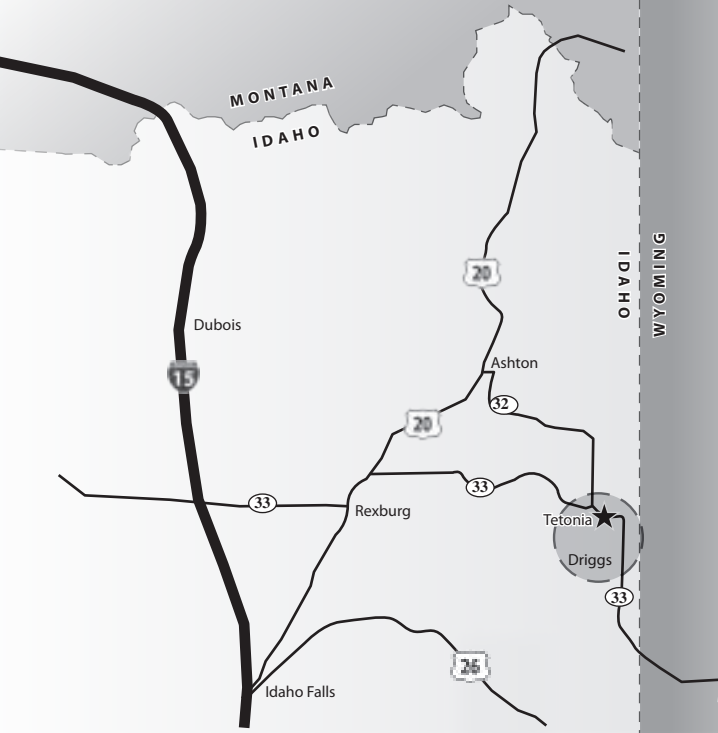

Visit the *Angus Journal*® Website,
www.angusjournal.com,
and view this sale book online.

rhodasimper@hotmail.com

First Year Breeding Guarantee:

All bulls selling for \$3,000 or more will be covered by this guarantee. If your bull is injured, and not able to naturally service cows, during the 90 days after initial turn-out we will give you credit toward a replacement bull or future sale. The credit will be equal to one-half of the bull's sale price, less one-half of his salvage value. Please have all injured bulls diagnosed by a veterinarian, and notify us before September 1, 2016 if you elect to make a claim.

Please note, this is not a life insurance policy. If you would like to purchase mortality insurance, an insurance representative will be available sale day.

Absentee Bidding:

We offer a 100% satisfaction guarantee on cattle purchased in your absence.

- We invite you to call Ken Dunn or C.L. Simper before the sale to select the lots you would like to purchase. We will bid in your absence and assure your spending limit is not exceeded.

Ken Dunn (208) 221-3866 or C.L. Simper (307) 380-6021

- This year we will not have a conference call line on sale day... If you cannot be with us sale day, please plan to come a few days before the sale and make your selections.
- We guarantee your satisfaction on bulls purchased in your absence.

Expected Progeny Differences are a prediction of how progeny of a sire will perform in each of the traits listed. EPDs are expressed in pounds. For example, Bull A has a weaning EPD of +50, and Bull B has a weaning EPD of +30. If these two bulls were used in your herd, on average, Bull A's calves would weigh 20 pounds more than Bull B's at weaning. EPDs are developed by the American Angus Association and are valuable for comparing the performance of animals within herd, and across herds.

CED - Calving Ease Direct EPD

Calving ease direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW EPD - Birth Weight EPD

This expresses the expected birth weights of a bull's progeny. This figure is valuable in selecting bulls to use on heifers. Typically, a BW EPD of less than 2.5 is preferred for heifers.

WW EPD - Weaning Weight Direct EPD

This is a predictor of the sire's ability to transmit weaning growth to his progeny.

Milk EPD - Weaning Weight Maternal EPD

The Milk EPD is the number of pounds of weaning weight that can be attributed to the milking ability of the bull's daughters.

YW EPD - Yearling Weight EPD

This is a predictor of the sire's ability to transmit yearling growth to his progeny.

ACTUAL BW - Actual Birth Weight

All of our calves are individually weighed at birth. This is their actual birth weight.

205 RATIO

The measure of each bulls weaning performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. We manage our calves in two contemporary groups. One group is calves born to cows; the other is calves born to heifers.

365 RATIO

The measure of each bulls yearling performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. The contemporary groups established at weaning are maintained through yearling.

ACT SCROTAL - Actual Scrotal

This is the bull's actual scrotal circumference, as measured on September 23, 2015.

PAP SCORE - Actual Pulmonary Arterial Pressure Result in inches of mercury

The PAP measurement is used to predict animals that are susceptible to developing pulmonary arterial hypertension (i.e. brisket disease) resulting in congestive right heart failure. Our PAP scores were taken by Tim Holt DVM of Gunnison, CO on September 21, 2015 when the bulls were roughly 16 months old.

MARB EPD - Marbling EPD

Marbling EPD is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RE EPD - Ribeye Area EPD

Ribeye Area EPD is expressed in square inches and is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$EN - Cow Energy Value

Cow Energy Value is expressed in dollars savings per cow per year, and assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

\$W - Weaned Calf Value

Weaned calf value quantifies four primary economic impact areas; birth weight, weaning weight, maternal milk, and mature cow size. \$W provides the expected dollar-per-head difference in future progeny preweaning performance in a multi-trait fashion.

\$F - Feedlot Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires. \$F uses weaning weight and yearling weight EPDs along with trait interrelationships and industry values for days-on-feed, ration costs, and cash cattle prices. Typical feedlot gain value, feed consumption, and cost differences are accounted for in the final calculation.

\$G - Grid Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires. \$G combines quality grade and yield grade attributes, and is calculated for animals with carcass EPDs, ultrasound EPDs, or both. A three-year rolling average is used to establish typical industry economic values for quality and yield grade schedules. Quality grade premiums are specified for Prime, CAB, and Choice carcasses, as well as Select and Standard. Yield grade premiums are incorporated for YG1 and YG2 (high yielding carcasses), with discounts for YG4 and YG5 (low red meat yield). Grid impact in \$/cwt and \$/head is calculated from the yield and quality grade components, and then combined to arrive at the grid value \$G.

\$B - Beef Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning and carcass value compared to progeny of other sires. \$B is composed of two pieces: \$F and \$G. To align \$B with marketplace realities, and appropriately value the carcass weight in Angus cattle, the following factors are incorporated into the final calculations for \$B:

- \$B is not just the sum of \$F and \$G
- Projected carcass weight and its value are calculated, along with production cost differences.
- \$B takes into consideration discounts for heavyweight carcasses.
- Final adjustments are made to prevent double counting weight between feedlot and carcass segments.

The resulting \$B value is not designed to be driven by one factor such as quality, yield, or weight. Instead, it is a dynamic result of the application of commercial market values to Angus genetics for both feedlot and carcass merit.

Dam's Production

This is the actual production record of the dam. For example, 5 WR 104 means the dam of the animal has had 5 calves that have weaned with an average weaning ratio of 104.

Pathfinder Program

The Angus Pathfinder program identifies cows that have excelled in production based on AHIR records of performance. To qualify for the report, a cow must have produced a calf measured through AHIR® in the past 18 months.

In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

The program identifies Pathfinder Cows in herds actively involved in AHIR. First, the female must produce her first calf near the herd's average age for first calving. More specifically, the maximum age accepted for first calving of a Pathfinder Cow is the within-herd average for first calving plus 30 days. The within-herd average is determined separately for each herd on AHIR.

As second criteria, the Pathfinder Cow must maintain a regular calving interval. The maximum calving interval is:
365 Days + (30 Days/Number of Calving Intervals)

Next, the Pathfinder Cow must produce at least three calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 herd mates or contemporaries must be evaluated together each year to determine the weight ratio. To continue to qualify each consecutive year, the cow must produce regularly and wean a calf that helps maintain the average weaning ratio of 105 or above. It is pointed out that once a cow is designated Pathfinder, she is always a Pathfinder, even though she might not qualify for listing each year.

A Pathfinder Cow, or Bull, is identified by the # symbol in front of their name.

Dear Valued Customers,

Welcome to our 17th Annual HD Dunn & Son Angus Ranch Bull Sale.

This year's bulls and heifers are a great set. They are sired by some of the leaders in the Angus industry. They have good feet and legs that will hold up in all environments. The bulls will go to work and get the job done in the harshest of conditions. The heifers will make mama cows that produce great calves. The females will perform for years in your program with great udders and fertility.

All of the animals produced here will shine with performance. They will stay healthy, maintain flesh, and have good temperaments.

Looking forward to seeing old friends and making new ones on sale day. If there is anything I can help with or if you would like to see the bulls and heifers prior to the sale, please contact me at 307-380-6021.

Sincerely,
C.L. Simper

C.L. Simper

RATIOS

Ratios are used to compare the performance of one animal to another. They are useful because they indicate how an individual compares to all of the others in the group measured.

Ratios are a percentage calculated by dividing the individual's measure, by the average of the group's measure. For example, if bull A's weaning weight is 700 lbs., and the average of the group measured (contemporary group) is 675 lbs., bull A's weaning ratio would be 104 (700 divided by 675 multiplied by 100). It is customary to round the result, so instead of 103.7 we would say 104.

The ratio for an animal that is average in a trait is 100. This is illustrated as follows; bull B's weaning weight is 675, and the average of the contemporary group is 675, his ratio is calculated by dividing his weaning weight of 675 by the contemporary average of 675 multiplied by 100. This equals a ratio of 100.

CONTEMPORARY GROUPS

When calculating ratios, there are two things one must first decide: what is to be measured, and what group do you want to compare. Deciding what to measure is simple. We measure all performance aspects of our animals: birth weight, weaning

weight, yearling weight, ultrasound carcass measures, PAP, etc. What's more of an issue is what groups do you compare. Establishing accurate contemporary groups is extremely important in measuring genetic variation. Contemporary groups are the cornerstone of genetic evaluation.

A contemporary group is a set of animals that have had an equal opportunity to perform: same sex, managed alike, and exposed to the same environmental conditions and feed resources. Contemporary grouping allows animals to be evaluated on how well they performed compared with their herdmates raised under similar environmental conditions.

Accurate contemporary groups require the breeder to ensure all animals in the group have been managed in the same manner.

We also believe in large contemporary groups. It is much more difficult to excel when competing in a large group than a small one, yet many breeders divide their herd into dozens of small groups. Our bulls are compared in two contemporary groups. One for bull calves out of cows, and one for bull calves out of heifers. We do the same for heifer calves.

We take contemporary grouping seriously, and you can be certain if a bull has excelled here it is because he earned the distinction.

Ken Dunn

Dear Friends,

Welcome to our 17th annual bull sale.

After a winter of very little snow and mostly bare ground after February, we were lucky enough to have some timely rain that yielded a reasonable hay crop and surprisingly good grass. I hope your region has experienced a good growing year as well.

We continue to get a lot of favorable feedback on our program and the direction we are headed. Some have asked if the commitment to our SimAngus program will change our breeding philosophy. I can assure you we remain true to producing cattle that can withstand the rigors of a harsh environment, calve unassisted, breed back and milk on limited feed, and have outstanding udder quality, foot and leg structure, and moderate mature size. Our SimAngus program is an extension of that philosophy with a genetic twist.

This year's lineup of bulls should look familiar. Game Day and Mountain Pass have done an exceptional job for us and this will be the last year of large groups of these two sires. We will continue to use them in some select planned matings, but we have enough daughters now that we are moving on to some new genetics.

I hope you will make time to join us for our sale. I think you will find our cattle well worth your time to evaluate and something we have become noted for: a meal second to none.

The bulls will be in their sale pens on Tuesday, Wednesday and Thursday before the sale on Friday. If the weather looks threatening, or if it would be more convenient to visit us prior to sale day, please feel free to drop by and make your selections early. We can arrange for your bids to be made sale day, and guarantee satisfaction with all orders.

Please call any time if you would like to visit about the bulls or our operation.

Kind regards,

Ken Dunn

Game Day cattle work very well for us, but after using him extensively for the past several years, this will be our last big group of sons. The bulls perform well, and the cows are fertile, easy fleshing, moderate sized with good udders. We will calve over 60 daughters this spring and will be adding more to our herd as time goes on. The daughters we have in production have an average weaning ratio on their calves of 104. They are exceptional females. Game Day adds thickness in a moderate mature frame. Game Day ranks is the top 1% of the Angus Breed for \$W and HP, top 3% for RE and 4% for \$EN.

Mountain Pass has proved to be one of the better bulls we have ever introduced into our program. I discovered Mountain Pass when delivering bulls in Colorado. I found him to be an exceptional individual and after looking at hundreds of his daughters, it was clear the bull had a lot to offer. Mountain Pass is a low PAP bull, and his daughters are moderate, sound, easy fleshing and good uddered. From a pedigree standpoint, Mountain Pass fits well into our program. His second dam, 4317, is the mother of our Explosion V1495 bull, and the dam of his mother's sire is Dixie Erica of CH 1019, the mother of Great Plains. We are continuing to use Mountain Pass heavily, and he is an exceptional heifer bull.

Ellingson Legacy M229, known by the nickname Olie is one of the most complete Simmental bulls we have used. He offers exceptionally low birth weight, and very good growth. The half-blood daughters we have kept look outstanding and will wean some of our heaviest calves at weaning. Olie died a few years ago and direct sons are hard to find. I think you will find it worth your time to evaluate ours.
