

21st Annual

BULL SALE

Friday, November 15, 2019

Tetonia, Idaho

Ken Dunn

Dear Cattlemen,

Friday, November 15th, 2019, marks the 21st Annual HD Dunn & Son Angus Ranch Bull Sale and I hope you will make time to join us at the ranch for this annual event.

In recognition that the vast majority of our buyers attend the sale, or come before sale day and make their selections, we are not going to offer on-line or phone bidding this year. If you are not able to join us on sale day, please contact me, Kelby or one of the ringmen to bid on your behalf. We guarantee your satisfaction on all bulls purchased in your absence.

Early this year, the American Angus Association released their first set of research EPDs for PAP scores. This has resulted in an increased awareness of High Mountain Disease (HMD) and the benefits of only introducing PAP tested bulls into herds that run at over 6,000 feet. We have had a lot of experience with HMD and this is the 15th year Dr. Tim Holt (the nation's authority on HMD and PAP testing) has PAP tested our bulls. While PAP EPDs are a tool to help in the selection of AI sires, there is no question that buying PAP tested bulls is the only way you are going to reduce the chance of introducing animals predisposed to HMD into your herd. There are a number of factors that go into assuring a PAP score is meaningful, like elevation of testing, amount of time the animal has been at elevation and the age of the animal. Dr Holt has tested our bulls every year for the past 15 years and has stated that any bull coming out of our program with a PAP score of 44, or less, can be taken to any ranch with a low risk of developing HMD. You can buy our bulls with confidence in knowing the risk for HMD can be reduced.

One of the most common bits of feedback we get from our customers is how well our bulls hold up. While the formula for achieving this is simple, there are not many other breeders willing to do what it takes to assure their bulls will stand the test of time. Here is what we have found that works: after weaning, our bulls are fed to gain 2.5 lbs/day, turned to grass in late May and then fed a modest growing ration before the sale. You will find our bulls in good condition, but are not fat, they have never been creep fed or had their feet trimmed...they are the real deal.

I look forward to visiting with you at this year's sale. And once again, please don't hesitate to call me, or Kelby 402-382-5810, if you have any questions.

Warm regards,

Ken Dunn
208-221-3866

The Dunn Family

21st Annual Bull Sale

Friday – November 15, 2019

100 Registered Angus Bulls • 20 Registered SimAngus Bulls

20 Commercial Angus Bred Heifers • 30 Commercial Angus Bred 3-year-olds

LOCATION:

At the ranch 4 miles south and 1 mile west of Tetonia, ID
(see map on page 3 of this sale book)

INSPECTION OF CATTLE:

We invite you to inspect our cattle anytime. The bulls will be in their sale pens Tuesday, Wednesday and Thursday before the sale on Friday. Drop by early and make your selection before sale day.

SALE ORDER:

Bulls and heifers will sell in sale book order.

ACCOMMODATIONS:

Super 8, Driggs, ID(208) 354-8888
Teton Valley Cabins.....(208) 354-8153

HERD HEALTH:

Our cattle are on a complete herd health program, and will sell with proper health papers for interstate shipment. All of the sale cattle were given BOVI-SHIELD GOLD FP5 VL5 this spring and in the fall they received an 8-way and dewormed with Dectomax Injectable and poured with Cyence.

FERTILITY:

All of the bulls were semen tested by Hoffmann AI- Doug Combs. The scrotal measurement listed in the sale book is the actual measurement taken 9/26/2019.

FEED RATION FOR BULLS:

Our bulls are developed in a practical manner, consistent with a mountain ranch. The bulls are raised without creep, and upon weaning fed a TMR to gain 2.5 lbs./day. This spring they were turned out on grass and in September brought in and fed a high-roughage TMR. The bulls have less than 0.10 of back fat and will sell in their working clothes.

TERMS AND CONDITIONS:

We expect you to be completely happy with your purchase, and will do what we can to assure this is the case. All bulls are fully guaranteed as outlined in the Terms and Conditions of the American Angus Association effective February 21, 2014.

RETAINED INTEREST:

We are retaining 1/3 interest in all bulls selling in the sale. The bull buyer receives the salvage value of the bull. Our interest applies to semen sales, and the ability for us to collect semen on the bull. If we desire semen, we will have the bull collected at our expense and your convenience. If you sell the bull as a breeding bull, we maintain our interest.

WINTERING PROGRAM:

We understand not everyone has the facilities to winter bulls. So, if you would like us to winter your bulls, we will do so for \$2.25/day. If you choose this option, please let the sale clerks know and we will settle for the feed upon pick-up or delivery.

DELIVERY:

Pick up your bulls within five days of the sale and receive a \$75 credit per bull. There is free delivery on the bulls, and registered heifers, to Idaho and adjoining states, including northern Colorado, with total purchases of \$3,000 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each. Buyers are responsible for arranging delivery of commercial heifers.

REPRESENTATIVES:

Jared Patterson, (208) 312-2386 American Angus Association
Curt Cox, (307) 630-4604..... Wyoming Livestock Roundup
Logan Ipsen, (916) 947-2392 Western Livestock Journal

AUCTIONEER:

Joe Goggins, (406) 861-5664
Announcements made sale day take precedence over printed material.

EPDS:

All of the Angus bulls were i50K tested and sell with genomic-enhanced EPDs. The EPDs listed in this sale book are current as of October 17, 2019.

WHY WE TEST WITH i50K FROM ZOETIS

Powered by i50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying i50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the i50K tested sires you buy from us to match calves and replacement heifers — through GeneMax® Advantage™ and GeneMax® Focus™ — to make better breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with i50K.

Number of progeny records in conventional genetic evaluation needed to achieve the same accuracy as GE-EPDs powered by i50K

**Directions:**

From the stop light in Driggs, head West on paved road for 4 miles. Turn North on 4000 W for 2.5 miles.

**First Year Breeding Guarantee:**

All bulls selling for \$3,000 or more will be covered by this guarantee. If your bull is injured, and not able to naturally service cows, during the 90 days after initial turn-out we will give you credit toward a replacement bull or next year's sale. The credit will be equal to one-half of the bull's sale price, less one-half of his salvage value. Please have all injured bulls diagnosed by a veterinarian, and notify us before September 1, 2020 if you elect to make a claim.

Please note, this is not a life insurance policy. If you would like to purchase mortality insurance, an insurance representative will be available sale day.

Absentee Bidding:

We offer a 100% satisfaction guarantee on cattle purchased in your absence.

- We invite you to call Ken Dunn or Kelby Nelson before the sale to select the lots you would like to purchase. We will bid in your absence and assure your spending limit is not exceeded.

Ken Dunn (208) 221-3866 Kelby Nelson (402) 382-5810

- The bulls will be in their sale pens on Wednesday, November 13th. If you cannot be with us on sale day, please come early and make your selections. You can bid with Superior Productions, or one of the ringmen can handle your order.
- We guarantee your satisfaction on bulls purchased in your absence.

EXPLANATION OF TERMS

Expected Progeny Differences are a prediction of how progeny of a sire will perform in each of the traits listed. EPDs are expressed in pounds. For example, Bull A has a weaning EPD of +50, and Bull B has a weaning EPD of +30. If these two bulls were used in your herd, on average, Bull A's calves would weigh 20 pounds more than Bull B's at weaning. EPDs are developed by the American Angus Association and are valuable for comparing the performance of animals within herd, and across herds.

CED - Calving Ease Direct EPD

Calving ease direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW EPD - Birth Weight EPD

This expresses the expected birth weights of a bull's progeny. This figure is valuable in selecting bulls to use on heifers. Typically, a BW EPD of less than 2.5 is preferred for heifers.

WW EPD - Weaning Weight Direct EPD

This is a predictor of the sire's ability to transmit weaning growth to his progeny.

Milk EPD - Weaning Weight Maternal EPD

The Milk EPD is the number of pounds of weaning weight that can be attributed to the milking ability of the bull's daughters.

YW EPD - Yearling Weight EPD

This is a predictor of the sire's ability to transmit yearling growth to his progeny.

ACTUAL BW - Actual Birth Weight

All of our calves are individually weighed at birth. This is their actual birth weight.

205 RATIO

The measure of each bulls weaning performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. We manage our calves in two contemporary groups. One group is calves born to cows; the other is calves born to heifers.

365 RATIO

The measure of each bulls yearling performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. The contemporary groups established at weaning are maintained through yearling.

ACT SCROTAL - Actual Scrotal

This is the bull's actual scrotal circumference, as measured on September 26, 2019.

PAP SCORE - Actual Pulmonary Arterial Pressure Result in inches of mercury

The PAP measurement is used to predict animals that are susceptible to developing pulmonary arterial hypertension (i.e. brisket disease) resulting in congestive right heart failure. Our PAP scores were taken by Tim Holt DVM of Gunnison, CO on September 16, 2019 when the bulls were roughly 16 months old.

MARB EPD - Marbling EPD

Marbling EPD is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RE EPD - Ribeye Area EPD

Ribeye Area EPD is expressed in square inches and is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$EN - Cow Energy Value

Cow Energy Value is expressed in dollars savings per cow per year, and assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M)

An index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull

female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

\$W - Weaned Calf Value

Weaned calf value quantifies four primary economic impact areas: birth weight, weaning weight, maternal milk, and mature cow size.

\$W provides the expected dollar-per-head difference in future progeny preweaning performance in a multi-trait fashion.

\$F - Feedlot Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires. \$F uses weaning weight and yearling weight EPDs along with trait interrelationships and industry values for days-on-feed, ration costs, and cash cattle prices. Typical feedlot gain value, feed consumption, and cost differences are accounted for in the final calculation.

\$B - Beef Value

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning and carcass value compared to progeny of other sires. \$B is composed of two pieces: \$F and \$G. To align \$B with marketplace realities, and appropriately value the carcass weight in Angus cattle, the following factors are incorporated into the final calculations for \$B:

- \$B is not just the sum of \$F and \$G
- Projected carcass weight and its value are calculated, along with production cost differences.
- \$B takes into consideration discounts for heavyweight carcasses.
- Final adjustments are made to prevent double counting weight between feedlot and carcass segments.

The resulting \$B value is not designed to be driven by one factor such as quality, yield, or weight. Instead, it is a dynamic result of the application of commercial market values to Angus genetics for both feedlot and carcass merit.

Dam's Production

This is the actual production record of the dam. For example, 5 WR 104 means the dam of the animal has had 5 calves that have weaned with an average weaning ratio of 104.

Pathfinder Program

The Angus Pathfinder program identifies cows that have excelled in production based on AHIR records of performance. To qualify for the report, a cow must have produced a calf measured through AHIR® in the past 18 months.

In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

The program identifies Pathfinder Cows in herds actively involved in AHIR. First, the female must produce her first calf near the herd's average age for first calving. More specifically, the maximum age accepted for first calving of a Pathfinder Cow is the within-herd average for first calving plus 30 days. The within-herd average is determined separately for each herd on AHIR.

As second criteria, the Pathfinder Cow must maintain a regular calving interval. The maximum calving interval is: 365 Days + (30 Days/Number of Calving Intervals)

Next, the Pathfinder Cow must produce at least three calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 herd mates or contemporaries must be evaluated together each year to determine the weight ratio. To continue to qualify each consecutive year, the cow must produce regularly and wean a calf that helps maintain the average weaning ratio of 105 or above. It is pointed out that once a cow is designated Pathfinder, she is always a Pathfinder, even though she might not qualify for listing each year.

A Pathfinder Cow, or Bull, is identified by the # symbol in front of their name.

Ratios

Ratios are used to compare the performance of one animal to another. They are useful because they indicate how an individual compares to all of the others in the group measured.

Ratios are a percentage calculated by dividing the individual's measure, by the average of the group's measure. For example, if bull A's weaning weight is 700 lbs., and the average of the group measured (contemporary group) is 675 lbs., bull A's weaning ratio would be 104 (700 divided by 675 multiplied by 100). It is customary to round the result, so instead of 103.7 we would say 104.

The ratio for an animal that is average in a trait is 100. This is illustrated as follows; bull B's weaning weight is 675, and the average of the contemporary group is 675, his ratio is calculated by dividing his weaning weight of 675 by the contemporary average of 675 multiplied by 100. This equals a ratio of 100.

Contemporary Groups

When calculating ratios, there are two things one must first decide: what is to be measured, and what group do you want to compare. Deciding what to measure is simple. We measure all performance aspects of our animals: birth weight, weaning weight, yearling weight, ultrasound carcass measures, PAP, etc. What's more of an issue is what groups do you compare. Establishing accurate contemporary groups is extremely important in measuring genetic variation. Contemporary groups are the cornerstone of genetic evaluation.

A contemporary group is a set of animals that have had an equal opportunity to perform: same sex, managed alike, and exposed to the same environmental conditions and feed resources. Contemporary grouping allows animals to be evaluated on how well they performed compared with their herdmates raised under similar environmental conditions.

Accurate contemporary groups require the breeder to ensure all animals in the group have been managed in the same manner.

We also believe in large contemporary groups. It is much more difficult to excel when competing in a large group than a small one, yet many breeders divide their herd into dozens of small groups. Our bulls are compared in two contemporary groups. One for bull calves out of cows, and one for bull calves out of heifers. We do the same for heifer calves.

We take contemporary grouping seriously, and you can be certain if a bull has excelled here it is because he earned the distinction.

Pick up your bulls within five days of the sale and receive a \$75 credit per bull or heifer. Otherwise, there is a free delivery on the bulls to Idaho and adjoining states, including northern Colorado, with total purchases of \$3,000 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each. Buyers are responsible for the delivery of commercial heifers.
