

High Altitude Bulls *You Can Count On*

HD DUNN & Son
ANGUS RANCH

24th Annual
BULL SALE

Saturday, November 12, 2022
Tetonia, Idaho

A Proven *High Altitude, Maternal Focused* **Angus Program**

Ken Dunn

Dear Cattlemen,

This year we will be hosting our 24th annual bull sale on Saturday, November 12, at 1:00 PM. I hope you will make time to join us.

While we frequently mention our dedication to PAP testing and our long history of performing this test, the foundation of our breeding program is focused on producing functional, balanced trait cattle. This focus, and the management that goes with it, is what our customers have come to rely upon when choosing our genetics. We thank you for your support and confidence in our program.

Of course, since we run at high elevation, we know firsthand the advantages of selecting cattle more naturally resistant to the effects of high altitude and High Mountain Disease, HMD. That is why Dr. Tim Holt has PAP tested our bulls every year for the past 18 years. Dr. Holt has stated that any bull coming out of our program with a PAP score of 42, or less, can be taken to any ranch with a low risk of developing HMD. There is no question that you can buy our bulls with confidence in knowing the risk for HMD in your herd can be reduced.

Over the years, we have offered on-line methods of purchasing bulls. However, internet-based sales have never caught on with our customers. Consequently, we have are not going to broadcast the sale online this year. We will have all the bulls penned and easily available to walk through on Wednesday before the sale. So, feel free to join us a day or two before the sale to make your selection and either attend the sale or have one of the ringmen handle your order. Your satisfaction is fully guaranteed.

I look forward to visiting with you at this year's sale. And once again, please don't hesitate to call me, or Kelby 402-382-5810, if you have any questions.

Kind regards,

Ken Dunn
208-221-3866

HD 24th Annual Bull Sale HD

SATURDAY | NOVEMBER 12, 2022

LUNCH AT NOON | SALE AT 1:00 PM MST
Join us for our old-fashioned BBQ meal

99 Registered Angus Bulls 13 Registered SimAngus Bulls
40 Commercial Angus Bred Heifers

LOCATION:

At the ranch 4 miles south and 1 mile west of Tetonia, ID
(see map on page 3 of this sale book)

INSPECTION OF CATTLE:

We invite you to inspect our cattle anytime. The bulls will be in their sale pens Wednesday, Thursday and Friday before the sale on Saturday. Drop by early and make your selection before sale day.

SALE ORDER:

The sale order will be available Thursday before the sale, and the bulls will sell in order of how they are penned.

ACCOMMODATIONS:

Super 8, Driggs, ID.....(208) 354-8888
Cobblestone Hotel and Suites.....(208) 787-4567

HERD HEALTH:

Our cattle are on a complete herd health program, and will sell with proper health papers for interstate shipment. All of the sale cattle were given BOVI-SHIELD GOLD FP5 VL5 this spring, and in the fall they received an 8-way and dewormed with Dectomax Injectable and poured with Cylence.

FERTILITY:

All of the bulls were semen tested by Hoffmann AI- Doug Combs. The scrotal measurement listed in the sale book is the actual measurement taken 9/21/2022.

FEED RATION FOR BULLS:

Our bulls are developed in a practical manner, consistent with a mountain ranch. The bulls are raised without creep, and upon weaning fed a TMR to gain 2.5 lbs./day. This spring they were turned out on grass and in September brought in and fed a high-roughage TMR. The bulls have less than 0.10 of back fat and will sell in their working clothes.

TERMS AND CONDITIONS:

We expect you to be completely happy with your purchase, and will do what we can to assure this is the case. All bulls are fully guaranteed as outlined in the Terms and Conditions of the American Angus Association effective February 21, 2014.

RETAINED INTEREST:

We are retaining 1/3 interest in all bulls selling in the sale. The bull buyer receives the salvage value of the bull. Our interest applies to semen sales, and the ability for us to collect semen on the bull. If we desire semen, we will have the bull collected at our expense and your convenience. If you sell the bull as a breeding bull, we maintain our interest.

WINTERING PROGRAM:

We understand not everyone has the facilities to winter bulls. So, if you would like us to winter your bulls, we will do so for \$3.00/day. If you choose this option, please let the sale clerks know and we will settle for the feed upon pick-up or delivery.

DELIVERY:

Pick up your bulls within five days of the sale and receive a \$75 credit per bull. There is free delivery on the bulls to Idaho and adjoining states, including northern Colorado, with total purchases of \$3,000 or more. Animals selling further away will be delivered at cost, guaranteed not to exceed \$275 each. Buyers are responsible for arranging delivery of commercial females.

REPRESENTATIVES:

Quannah Gardiner, (620) 635-0294....American Angus Association
Curt Cox, (307) 630-4604 Wyoming Livestock Roundup
Jared Patterson, (208) 312-2386..... Western Livestock Journal

AUCTIONEER:

Joe Goggins (406) 861-5664
Announcements made sale day take precedence over printed material.

EPDS:

All of the Angus bulls were i50K tested and sell with genomic-enhanced EPDs. The EPDs listed in this sale book are current as of October 14, 2022.

Ken Dunn 208-221-3866
hkennethdunn@gmail.com

Kelby Nelson (402) 382-5810
nellybuff24@gmail.com

ANGUS MEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink™, CAB®, Pathfinder®.

WHY WE TEST WITH i50K FROM ZOETIS

Powered by i50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying i50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the i50K tested sires you buy from us to match calves and replacement heifers — through GeneMax® Advantage™ and GeneMax® Focus™— to make better breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with i50K.

Number of progeny records in conventional genetic evaluation needed to achieve the same accuracy as GE-EPDs powered by i50K

Trait	Progeny Equivalents
Heifer Pregnancy (HP)	14
Calving Ease Direct (CED)	28

Directions:

From the stop light in Driggs, head West on paved road for 4 miles. Turn North on 4000 W for 2.5 miles.

First Year Breeding Guarantee:

All bulls selling for \$3,000 or more will be covered by this guarantee. If your bull is injured, and not able to naturally service cows, during the 90 days after initial turn-out we will give you credit toward a replacement bull or next year's sale. The credit will be equal to one-half of the bull's sale price, less one-half of his salvage value. Please have all injured bulls diagnosed by a veterinarian, and notify us before September 1, 2023 if you elect to make a claim.

Please note, this is not a life insurance policy. If you would like to purchase mortality insurance, an insurance representative will be available sale day.

Absentee Bidding:

We offer a 100% satisfaction guarantee on cattle purchased in your absence.

- We invite you to call Ken Dunn or Kelby Nelson before the sale to select the lots you would like to purchase. We will bid in your absence and assure your spending limit is not exceeded.

Ken Dunn (208) 221-3866 Kelby Nelson (402) 382-5810

- The bulls will be in their sale pens on Wednesday, November 9. If you cannot be with us on sale day, please come early and make your selections. You can bid with DVAuction, or one of the ringmen can handle your order.
- We guarantee your satisfaction on bulls purchased in your absence.

EXPLANATION OF TERMS

EXPECTED PROGENY DIFFERENCES are a prediction of how progeny of a sire will perform in each of the traits listed. EPDs are expressed in pounds. For example, Bull A has a weaning EPD of +50, and Bull B has a weaning EPD of +30. If these two bulls were used in your herd, on average, Bull A's calves would weigh 20 pounds more than Bull B's at weaning. EPDs are developed by the American Angus Association and are valuable for comparing the performance of animals within herd, and across herds.

CED - CALVING EASE DIRECT EPD

Calving ease direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW EPD - BIRTH WEIGHT EPD

This expresses the expected birth weights of a bull's progeny. This figure is valuable in selecting bulls to use on heifers. Typically, a BW EPD of less than 2.5 is preferred for heifers.

WW EPD - WEANING WEIGHT DIRECT EPD

This is a predictor of the sire's ability to transmit weaning growth to his progeny.

MILK EPD - WEANING WEIGHT MATERNAL EPD

The Milk EPD is the number of pounds of weaning weight that can be attributed to the milking ability of the bull's daughters.

YW EPD - YEARLING WEIGHT EPD

This is a predictor of the sire's ability to transmit yearling growth to his progeny.

ACTUAL BW - ACTUAL BIRTH WEIGHT

All of our calves are individually weighed at birth. This is their actual birth weight.

205 RATIO

The measure of each bulls weaning performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. We manage our calves in two contemporary groups. One group is calves born to cows; the other is calves born to heifers.

365 RATIO

The measure of each bulls yearling performance relative to the others in his contemporary group. A ratio of 100 is average for the contemporary group. The contemporary groups established at weaning are maintained through yearling.

ACT SCROTAL - ACTUAL SCROTAL

This is the bull's actual scrotal circumference, as measured on September 28, 2022.

PAP SCORE - Actual Pulmonary Arterial Pressure Result in inches of mercury

The PAP measurement is used to predict animals that are susceptible to developing pulmonary arterial hypertension (i.e. brisket disease) resulting in congestive right heart failure. Our PAP scores were taken by Tim Holt DVM of Gunnison, CO on September 1, 2022 when the bulls were roughly 18 months old.

MARB EPD - MARBLING EPD

Marbling EPD is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RE EPD - RIBEYE AREA EPD

Ribeye Area EPD is expressed in square inches and is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$EN - COW ENERGY VALUE

Cow Energy Value is expressed in dollars savings per cow per year, and assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

MATERNAL WEANED CALF VALUE (\$M)

An index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

\$W - WEANED CALF VALUE

Weaned calf value quantifies four primary economic impact areas; birth weight, weaning weight, maternal milk, and mature cow size. \$W provides the expected dollar-per-head difference in future progeny preweaning performance in a multi-trait fashion.

\$F - FEEDLOT VALUE

An index value expressed in dollars per head is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires. \$F uses weaning weight and yearling weight EPDs along with trait interrelationships and industry values for days-on-feed, ration costs, and cash cattle prices. Typical feedlot gain value, feed consumption, and cost differences are accounted for in the final calculation.

\$C - COMBINED VALUE

Combined Value (\$C), expressed in dollars per head, includes all traits that make up both \$M and \$B, with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. Remaining cull heifer and steer progeny are assumed to be sent to the feedlot where producers retain ownership of cattle and eventually sell them on a quality-based carcass merit grid.

DAM'S PRODUCTION

This is the actual production record of the dam. For example, 5 WR 104 means the dam of the animal has had 5 calves that have weaned with an average weaning ratio of 104.

PATHFINDER PROGRAM

The Angus Pathfinder program identifies cows that have excelled in production based on AHIR records of performance. To qualify for the report, a cow must have produced a calf measured through AHIR® in the past 18 months.

In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

The program identifies Pathfinder Cows in herds actively involved in AHIR. First, the female must produce her first calf near the herd's average age for first calving. More specifically, the maximum age accepted for first calving of a Pathfinder Cow is the within-herd average for first calving plus 30 days. The within-herd average is determined separately for each herd on AHIR.

As second criteria, the Pathfinder Cow must maintain a regular calving interval. The maximum calving interval is:
$$365 \text{ Days} + (30 \text{ Days} / \text{Number of Calving Intervals})$$

Next, the Pathfinder Cow must produce at least three calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 herd mates or contemporaries must be evaluated together each year to determine the weight ratio. To continue to qualify each consecutive year, the cow must produce regularly and wean a calf that helps maintain the average weaning ratio of 105 or above. It is pointed out that once a cow is designated Pathfinder, she is always a Pathfinder, even though she might not qualify for listing each year.

A Pathfinder Cow, or Bull, is identified by the # symbol in front of their name.

RATIOS

Ratios are used to compare the performance of one animal to another. They are useful because they indicate how an individual compares to all of the others in the group measured.

Ratios are a percentage calculated by dividing the individual's measure, by the average of the group's measure. For example, if bull A's weaning weight is 700 lbs., and the average of the group measured (contemporary group) is 675 lbs., bull A's weaning ratio would be 104 (700 divided by 675 multiplied by 100). It is customary to round the result, so instead of 103.7 we would say 104.

The ratio for an animal that is average in a trait is 100. This is illustrated as follows; bull B's weaning weight is 675, and the average of the contemporary group is 675, his ratio is calculated by dividing his weaning weight of 675 by the contemporary average of 675 multiplied by 100. This equals a ratio of 100.

CONTEMPORARY GROUPS

When calculating ratios, there are two things one must first decide: what is to be measured, and what group do you want to compare. Deciding what to measure is simple. We measure all performance aspects of our animals: birth weight, weaning weight, yearling weight, ultrasound carcass measures, PAP, etc. What's more of an issue is what groups do you compare. Establishing accurate contemporary groups is extremely important in measuring genetic variation. Contemporary groups are the cornerstone of genetic evaluation.

A contemporary group is a set of animals that have had an equal opportunity to perform: same sex, managed alike, and exposed to the same environmental conditions and feed resources. Contemporary grouping allows animals to be evaluated on how well they performed compared with their herdmates raised under similar environmental conditions.

Accurate contemporary groups require the breeder to ensure all animals in the group have been managed in the same manner.

We also believe in large contemporary groups. It is much more difficult to excel when competing in a large group than a small one, yet many breeders divide their herd into dozens of small groups. Our bulls are compared in two contemporary groups. One for bull calves out of cows, and one for bull calves out of heifers. We do the same for heifer calves.

We take contemporary grouping seriously, and you can be certain if a bull has excelled here it is because he earned the distinction.

NOTES

HD

YOU'VE DONE THE WORK.

Get paid for it.

Get paid for the **records**.

Get paid for **quality** genetics.

Get paid for the power of **Angus**.

In 2021, AngusLink calves
earned an average
PREMIUM of \$13.01/cwt.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for your operation.

Call us at 816-383-5100 to sign up or
visit [AngusLink.com](https://www.AngusLink.com) for more information.
